Attn: Tom Rogers

Subject: Sage Mas90 Paperless Office

Dear Tom,

I just wanted to drop you a note regarding the "Paperless Office" feature in the latest upgrade to our Sage Mas90 accounting software. As you may recall, our corporation has many locations over the six northwestern states which makes for a logistical nightmare when communicating sensitive documents. Transmission of financial reports, employee payroll related earnings reports, and reports relating to state tax filings are just a few examples of the problems we have now corrected with this new feature you installed. This letter may seem a bit "over the top" for just one feature, but when you add up the costs incurred by generating a report twice along with the security issues involved you would be surprised at the cost savings. As to the security issues, prior to upgrade certain employee information could only be printed and sent by mail or facsimile. Now, however, the same information can be generated through paperless office and sent directly to the employee or financial institution by e-mail.

Thanks again,

Tim Lehman
